

"Using Microsoft Excel to Determine and Analyze Job Profitability"

April 22nd Lunch 'N Learn

- Find the "sweet spot" of most profitable work
- Quickly and accurately determine most profitable customers
- Evaluate the accuracy and consistency of your estimating

Managing and maximizing job profitability is the key to any construction business. Learn the powerful ways to quickly and clearly analyze your job profitability by customer, job size, estimator, job supervision, and more. This workshop will provide a framework for capturing and analyzing large amounts of information and making it meaningful and useful to everyday business decisions. Specifically, we will focus on the analysis job profitability using Microsoft Excel.

All participants in this workshop will receive a Microsoft Excel template that they may modify and use in their own business.

Workshop Presented by ASA Chicago Board Member Larry Wendt of Syscon, Inc.
